Great Game . I mean it, you can just put your Brain on auto pilot, it's a simple fun 2D platformer with a touch of challenge to it. This game has a funny atmosphere with a cool Sound Track. If you opt to get the original green light edition (Dlc) It's like having two games in one (with different game mechanics).  
For the price you can't go wrong.

Ps- The platforming is a little slippery (But I still love it).
